

SRZ

General Description

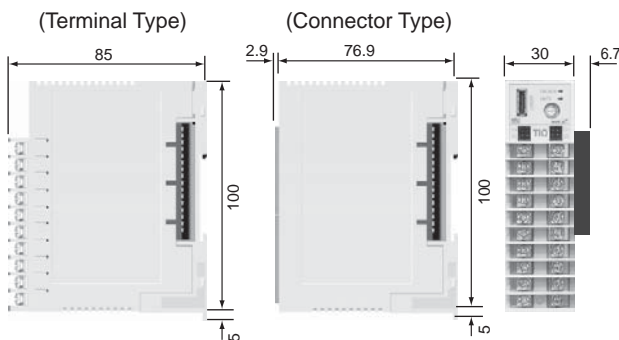

The SRZ is a DIN rail mounted module type temperature controller. 4 or 2 loop control can be performed with a single compact module. Module can have 4 CT (Current transformer) inputs. A maximum of 16 temperature control modules can be connected for 64-loop control. Power supply and communication lines are via a connector on the side, no wiring required.

Features

- ☆ 4 loop controller packed in one compact module
- ☆ Multi-zone space-saving and less wiring
- ☆ Heat/Cool action
- ☆ Heater/Loop break alarms
- ☆ DIN rail mounting

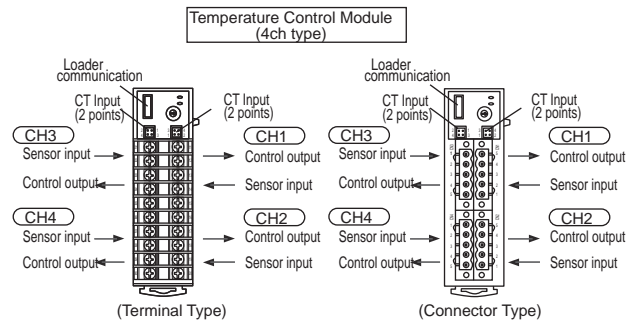

Space-Saving and Less Wiring

4CH temperature controller packed in one compact module. Separated installation by control zones is possible. Wiring to sensors and output devices is minimized. Modules can be installed separately inside a control panel or a machine to reduce the physical size of the housing.

Module Configuration

Input/Output Configuration

Digital Input/Output Module

CT Input Module

Features

Flexible temperature control system configuration

MODBUS/ANSI RKC standard protocol communication

PLC special protocol

Z-COM module can manage data from connected control modules via high-speed bus connection. MAPMAN program-less connection to PLC is also available.

Temperature uniformity at ramp-up (Auto-temperature rise function)

The Auto-temperature rise function controls the rate of temperature rise uniformly across all the channels in a specified group. The SRZ system has the ability to have multiple groups within each system. This uniform controlled temperature rise will suppress local overheating and mechanical distortion in the tools, contributing to higher product quality.

Peak current suppression

Peak current suppression minimizes the capacity of electrical materials such as power supply equipments, switchboards, power lines, and breakers since this function makes the timing of control output on each channel separate so that the current consumption of the channel with maximum heater capacity is detected as maximum current consumption.

Features

External disturbance suppression with autotuning (EDS)

EDS with autotuning calculates optimum settings to suppress control disturbance caused by external factors. The function is activated by a DI signal to adjust control output (feed-forward) to compensate for the disturbance.

It is suitable for an application in which external disturbance can be predicted, such as wafer-in/out in semiconductor manufacturing equipment, and during injection in injection molding machine.

Automatic SV setting on heater break alarm and heater over current alarm

Set values of Heater break alarm (HBA) and heater over current alarm are automatically set by pressing a front-mounted push button when a heater is on. This function is also available for three-phase heater break alarm.

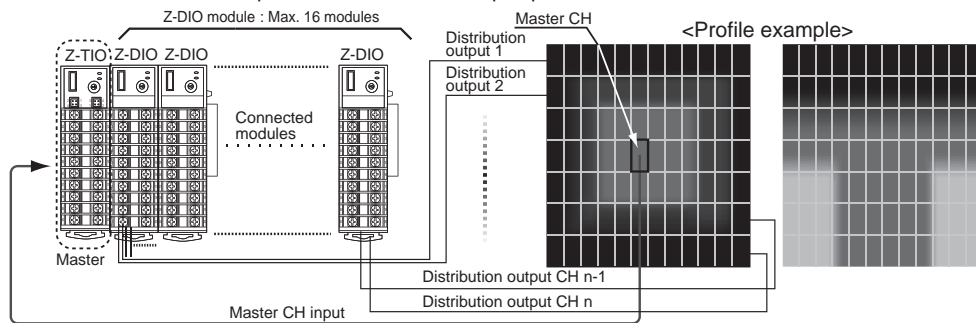

- HBA function of Z-CT module is designed only for time proportional control (On/Off output). Phase control (continuous output) is not available.
- The CT input monitor value indicates the effective value when the heater break alarm function is enabled and output is 100% (heater ON) or 0% (heater OFF.)

Multi-loop profile control (Output ratio distribution function)

This function enables one master loop to distribute its output value to multiple outputs of Z-DIO modules. Bias and ratio can be set for each output independently.

A maximum of 187 distribution outputs from one control loop is possible when Z-DIOs and Z-TIOs are used for output ratio distribution.

- Output ratio distribution function works via back plane connected modules.
- Distribution output from DIO module becomes open collector output or relay contact output.

Communication with a PC via USB port (Loader communication)

The SRZ module has a standard loader port on the front panel to connect to a PC USB port via COM-K2 (USB communication converter). Using Win-UCI software on the PC, parameter settings can be easily saved on the PC in CSV format, and the same parameter settings are easily copied to other SRZ modules.

- The Loader port is only for parameter setup

- The power to COM-K2 is supplied from the PC via the USB port so no power supply is necessary.

Model Code : USB communication converter (COM-K2)

Specifications	Model and Suffix code	
	COM - K -	
Loader communication cable	Without loader communication cable	N
	With loader communication cable	1

Module type Digital Temperature Controller SRZ

Display unit

Operation Panel : OPC-V606E

5.7 inches STN monochrome LCD operation panel

External Dimension

Specifications

Display : STN monochrome LCD
 Power supply voltage : 24V DC
 Power consumption : Less than 10W
 Ambient temperature : 0 to 50°C
 Ambient humidity : Less than 85% RH
 Waterproof/Dustproof : IP65
 Weight : IP65
 Compliance : cUL, CE marking

Maximum number of modules:
 31 modules (16 Z-TIO-A/B and 16 DIO modules)

Model Code

Specifications	No	Model Code	①	②	③
Display method	①	STN monochrome LCD	3		
Available controller	②	Z-TIO/DIO (MODBUS protocol)		5	
Language	③	Japanese			J

Accessories (Sold separately)

Specifications	Model
Cable : Between OPC-V606E and Z-TIO (Length 3m)	V6-MLT

Compact Setting Display : OP10

This DIN rail mounted compact display and setting unit is suitable for on-site operation change and monitoring.

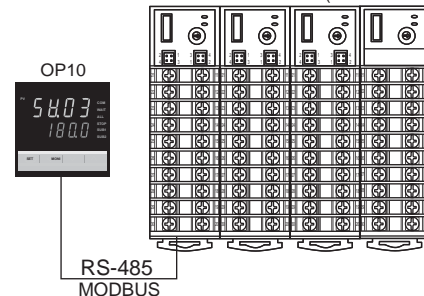

- ◆ Monitor item
 - Measured value (PV)
 - Set value (SV)
 - Heat-side output value (MV)
 - Cool-side output value (Mc)
 - Event 1 status (A1)
 - Event 2 status (A2)
- ◆ Setting item
 - Autotuning
 - Event 1 (A1)
 - Event 2 (A2)
 - Heat-side proportional band (P)
 - Heat-side integral time (I)
 - Heat-side derivative time (D)
 - Cool-side proportional band (Pc)
 - PV bias (Pb)

◆ Setting by MODBUS register address

Any Modbus register address can be specified to set or display data. This is used to set or display data that is not included within the OP10 parameter.

Maximum number of modules:
 Z-TIO : 16 modules (Max. 99CH)
 Z-COM : 16 modules (Max. 99CH)

Specifications

Display: LCD display, 4-digitX2 (Green/Orange)
 Power supply voltage :
 a) 100 to 240V AC (Rating), 50/60Hz
 b) 24V AC (Rating), 50/60Hz
 c) 24V DC (Rating)
 Power consumption
 4VA max. (at 100V AC) 7VA max. (at 240V AC)
 4VA max. (at 24V AC) 100mA max (at 24V DC)
 Ambient temperature: 0 to 50°C
 Ambient humidity: 45 to 85% RH
 Waterproof/Dustproof: IP66 (Option)
 Weight: Approx 120g
 Compliance with standard: cUL, CE marking, C-Tick

External Dimension

 Model code : KCA100-526

Specifications

Temperature control module (Z-TIO)

Input

Number of inputs

- 4 points (Z-TIO-A), 2 points (Z-TIO-B)
- Isolated between each channel.

Input

- Universal input
- Temperature, Current, Low voltage input group
- Thermocouple : K, J, R, S, B, E, T, N (JIS/IEC), PLII (NBS), W5Re/W26Re (ASTM)
 - Influence of external resistance : Approx. 0.125μV/Ω
 - Input break action : Up-scale / Down-scale (Selectable)
- RTD : Pt100 (JIS/IEC), JPt100 (JIS)
 - Influence of input lead resistance : Approx. 0.02[%/Ω] of reading
 - Maximum 10Ω per wire
 - Input break action : Up-scale
- Low voltage : 0 to 1V DC, 0 to 100mV DC, 0 to 10mV DC,
 - Input break action : Up-scale / Down-scale (Selectable)
- Current : 4 to 20mA DC, 0 to 20mA DC
 - Input break action : Uncertain (indicates a value around 0mA)
- High voltage input group
- High voltage : 0 to 5V DC, 1 to 5V DC, 0 to 10V DC
 - Input break action : Uncertain (indicates a value around 0V)

Sampling Time

0.25 sec

Input Digital Filter

0.1 to 100.0 sec (OFF when 0 is set.)

PV Bias

-span to +span

PV Ratio

0.500 to 1.500

Square Root Extraction

Equation : $PV = \sqrt{\text{Input value} \times PV \text{ ratio} + PV \text{ bias}}$
 Low level cut OFF : 0.00 to 25.00% of span

Performance

Measuring Accuracy

- a) Thermocouple
 - Type : K, J, T, E, N, PLII
 - Less than -100°C (-148°F) : ±2.0°C (±3.6°F)
 - 100 to 500°C (-148 to 932°F) : ±1.0°C (±1.8°F)
 - More than 500°C (932°F) : ±(0.2% of Reading + 1 digit)
 - Type : N, S, R, W5Re/W26Re
 - Less than 1000°C (1832°F) : ±2.0°C (±3.6°F)
 - More than 1000°C (1832°F) : ±(0.2% of Reading + 1 digit)
 - Type : B
 - Less than 400°C (752°F) : ±70.0°C (±126°F)
 - 400 to 1000°C (752 to 1832°F) : ±2.0°C (±3.6°F)
 - More than 1000°C (1832°F) : ±(0.2% of Reading + 1 digit)
- Cold junction temperature compensation error when close horizontal mounting
 - Terminal type : ±1.0°C (1.8°F) [at 23±2°C (73±3.6°F)]
 - Less than -100°C (-148°F) input : ±2.0°C (±3.6°F)
 - Connector type : ±2.0°C (3.6°F) [at 23±2°C (73±3.6°F)]
 - Less than -100°C (-148°F) input : ±4.0°C (±7.2°F)
- b) RTD
 - Less than 200°C (392°F) : ±0.4°C (±0.8°F)
 - More than 200°C (392°F) : ±(0.2% of Reading + 1 digit)
- c) DC voltage and DC current
 - ±(0.2% of span)

Insulation Resistance

More than 20MΩ (500V DC) between measured terminals and ground
 More than 20MΩ (500V DC) between power terminals and ground
 More than 20MΩ (500V DC) between measured terminals and power terminals

Dielectric Strength

750V AC for one minute between measured terminals and ground
 750V AC for one minute between power terminals and ground
 750V AC for one minute between measured terminals and power terminals

Control

Control Method

- a) Brilliant II PID control
 - Available for reverse and direct action.
- b) Brilliant PID control (Heat/Cool type)
- c) Position proportioning control without feedback resistance.
 - a), b), c) is selectable.

Autotuning Method

- a) For PID control (Direct action/Reverse action)
- b) For Heat/Cool PID control (For extruder, air cooling type)
- c) For Heat/Cool PID control (For extruder, water cooling type)
- d) For Heat/Cool PID control
- e) For Position proportioning control without feedback resistance

Startup tuning

- The condition to activate Startup Tuning is selectable among a) to g)
- a) At power-on, one-time tuning
 - b) At SV change, one-time tuning
 - c) At power-on and SV change, one-time tuning
 - d) At power-on, always on
 - e) At SV change, always on
 - f) At power-on and SV change, always on
 - g) Function off
- (Not available for Position proportioning control without feedback resistance)

Major Setting Range

- Set value : Same as input range.
- Proportional band : 0 to input span (°C, °F) (Temperature input)
0.0 to 1000.0% of span (Voltage, Current input)
(ON/OFF control when P = 0)
- Integral time : 0 to 3600sec. or 0.0 to 1999.9sec.
(selectable)
- Derivative time : 0 to 3600sec. or 0.0 to 1999.9sec.
(selectable)
- Cool-side proportional band : 1(0.1,0.01) to input span (°C, °F)(Temperature input)
0.1 to 1000.0% of span (Voltage, Current input)
- Cool-side integral time : 0 to 3600sec. or 0.0 to 1999.9sec.
(selectable)
- Cool-side derivative time : 0 to 3600sec. or 0.0 to 1999.9sec.
(selectable)
- Deadband/Overlap : -span to +span (Temperature input)
-100.0 to +100.0% of span (Voltage, Current input)
- Control response : Slow, Medium, Fast
- Ramp-to-setpoint : 0 to span per Time
(Time is selectable between 1 and 3600 sec)
(Up/Down individual setting)
- Output limiter : -5.0 to +105.0% (High/Low individual setting)
- Cool-side output limiter : -5.0 to +105.0% (High/Low individual setting)
- Output change rate limiter : 0.0 to 100.0%/sec. (Up/Down individual setting)
- Cool-side output change rate limiter : 0.0 to 100.0%/sec. (Up/Down individual setting)
- Proportional cycle time : 0.1 to 100.0 sec.
- Cool-side proportional cycle time : 0.1 to 100.0 sec.
- Manual reset : -100.0 to +100.0%
- Manual output : Output limiter low to output limiter high
- Output at control stop mode : -5.0 to 100.5% (Heat/Cool individual setting)

Motor Valve Control (position proportioning control type only)

- Motor time : 5 to 1000 sec. (full open to full close)
- Integral output limiter : OFF, 100.0 to 200.0% of motor time
- Neutral zone : 0.1 to 10.0%
- Differential gap : 0.1 to 5.0%
- Valve action at a stop mode : a) CLOSE : OFF, OPEN : OFF
b) CLOSE : ON, OPEN : OFF
c) CLOSE : OFF, OPEN : ON
• a), b), c) is selectable.

Memory area

- Number of memory area : 8 memory areas
- Setting item : Set value (SV), Proportional band, Integral time, Derivative time, Cool-side proportional band, Cool-side integral time, Cool-side derivative time, Deadband/Overlap, Control response, Manual reset, Ramp-to-setpoint (Up/Down), Event set vale, LBA time, LBA deadband, Soak time : 0 min 0.00 sec to 199 min 59 sec or 0 hr 00 min to 9 hr 59 min
(selectable)
- Linking area number : OFF, 1 to 8

Output Type

- Relay output : Form A contact, 250V AC 3A (resistive load)
- Voltage pulse output : 0/12V DC
(Load resistance : More than 600Ω)
• Power supply and output are not isolated.
- Current output : 4 to 20mA DC, 0 to 20mA DC
(Load resistance : Less than 600Ω)
• Power supply and output are not isolated.
- Continuous voltage output : 0 to 1V DC, 0 to 5V DC, 1 to 5V DC, 0 to 10V DC
(Load resistance : More than 1kΩ)
• Power supply and output are not isolated.
- SSR (Triac) output : Rated current : 0.5A
- Open collector output : Load voltage : Less than 30V DC,
(Sink type) Maximum load current : Less than 100mA
ON voltage : Less than 2V DC (at 100mA)

Specifications

Temperature control module (Z-TIO)

Event (Alarm)

Number of Event Setting
Up to 4 points (Event 1 to 4)

Alarm Type

Process high, Process low, Deviation high, Deviation low, Deviation high/low, Band, Set value high, Set value low, MV value high, MV value low, Cool side MV value high, Cool side MV value low, FBR value high, FBR value low, LBA (Control loop break alarm), Deviation high between channel, Deviation low between channel, Deviation high/low between channel, Deviation band between channel, Temperature rise completion

- LBA is assignable to event 4.
- Temperature rise completion is assignable to event 3.

Setting range

Deviation, Deviation between channel, Temperature rise completion
: - (Input span) to + (input span)
Differential gap : 0 to input span

Process, Set value : Same as input range
Differential gap : 0 to input span

MV value, FBR valued : -5.0 to +105.0%

Control loop break alarm (LBA)
: LBA time : 0 to 7200 sec. (OFF by setting zero)
LBA deadband : 0 to input span

Other Functions

- Hold/Re-hold action (Valid for deviation/band/process alarm only)
 - Hold action is activated at Power-up and STOP to RUN.
 - Re-hold action is activated at Power-up, STOP to RUN, and the control set value change.
- Event action is configurable in case of input abnormality.
- Energized/de-energized action is configurable.
- Delay timer : 0 to 1800 sec
- Interlock (latch) function is configurable.

Heater Break Alarm (Optional)

Number of CT Input : 4 points (4ch type), 2 points (2ch type)
CT Input type : CTL-6-P-N (30A), CTL-12-S56-10L-N(100A)
• Selectable

Accuracy : ± 5% of input value or ± 2A (whichever is larger)

Display range : 0.0 to 100.0A

Communications

Communication method : RS-485
Communication speed : 4800, 9600, 19200, 38400 BPS
Protocol : a) ANSI X3.28(1976) 2.5 B1 (RKC standard)
b) MODBUS- RTU
c) PLC special protocol (Mapman): Z-TIO-C/D Module
Correspond to MITSUBISHI MELSEC PLC series

- A compatible, 1C Frame (type 4)
AnA/AnU common command (QR/QW)
(AnA, QnA series, Q series)
QnA compatible, 3C Frame (type 4) command (0401/1401)
(QnA/Q series) • Z Resistor only
- A compatible, 1C Frame (type 4)
ACPU common command (WR/WWW)
(A series, FX2N, FX2NC series)

Bit format : Start bit : 1, Data bit : 7 or 8 • For MODBUS 8 bit only
Parity bit : Without, Odd or Even,
Stop bit : 1 or 2 • For MODBUS 1 bit

Maximum connection : Z-TIO-A/B ; 32 modules, Z-TIO-C/D : 16 modules

Other Functions

Remote set input
Temperature ratio setting
Cascade control mode
Output ratio distribution function
Function which distributes the control output value of the master channel to the Z-DIO/TIO module output.

EDS function

Function which suppresses overshoot and undershoot.

Auto-temperature-rise with learning function

Function which achieves temperature uniformity at ramp-up in the same control group while learning function calculates optimum parameter settings for this function.
Up to 16 groups can be configured within modules which are connected each other by connectors on the base.

Peak current suppression function

When the output type is time proportional output, the peak current suppression function changes the start timing of the proportional cycle so that the outputs of the channels do not turn ON simultaneously.

- The peak current suppression function is performed in one modules.

Master-slave Mode

With this function, when a mode of Mode-master channel is changed, the mode of all slave channels (preset) will be also automatically changed. Modes can be selected among various mode function such as memory area (recipe).

Digital input/output module (Z-DIO)

Digital Input

Number of inputs

- 8 points
- Isolated input (4 points/common)

Input method

Voltage contact input
Open : Less than 5.0V, Close : More than 17.5V
Contact current : Less than 3.0mA
Allowable input voltage : Less than 26.4V DC

Function

Interlock reset, RUN/STOP, Remote/Local, Auto/Manual, Memory area selection, External disturbance suppression

Function allocation

See digital input allocation table

Digital Output

Number of inputs

- 8 points
- 4 points/common

Output signal

- Relay contact output, Form a contact
250V AC 1A , 30V DC 1A (Resistive load)
- Open collector output (Sink type)
Allowable load current : Less than 100mA
Load voltage : Less than 30V
Minimum load : 0.5mA
ON voltage : Less than 2.0V (at maximum load current)
Leakage current at OFF : Less than 0.1mA

Function

Event 1 output (CH1 to CH4), Event 2 output (CH1 to CH4)
Event 3 output (CH1 to CH4), Event 4 output (CH1 to CH4)
HBA output, Burn-out status output, Temperature rise completion output, Manual output

Function allocation

See output allocation table

Communications

Communication method : RS-485
Communication speed : 4800, 9600, 19200, 38400 BPS
Protocol : ANSI X3.28(1976) 2.5 B1
MODBUS

Bit format : Start bit : 1, Data bit : 7 or 8 • For MODBUS 8 bit only
Parity bit : Without, Odd or Even,
Stop bit : 1 or 2 • For MODBUS 1 bit

Maximum connection : 16 units

CT (Current transformer) input module (Z-CT)

Input

Number of CT Input : 12 points
CT Input type and range : CTL-6-P-Z : 0.0 to 10.0A
CTL-6-P-N : 0.0 to 30.0A
CTL-12-S56-10L-N : 0.0 to 100.0A
• Selectable

Sampling cycle : 3 sec

Accuracy

CTL-6-P-Z : ± 0.3A
CTL-6-P-N : ± 5% of input value or ± 2A (whichever is larger)
CTL-12-S56-10L-N : ± 5% of input value or ± 2A (whichever is larger)

Event (Alarm)

Alarm type : Heater break alarm (HBA) and Heater over current alarm

- Interlock (latch) function is configurable.
- Alarm delay time : 0 to 255 times

Setting method

- Via communication or push-button switch
- Automatic alarm setting function is available.

CT allocation

Module address setting and channel setting

Communications

Communication method : RS-485
Communication speed : 4800, 9600, 19200, 38400 BPS
Protocol : ANSI X3.28(1976) 2.5 B1
MODBUS

Bit format : Start bit : 1, Data bit : 7 or 8 • For MODBUS 8 bit only
Parity bit : Without, Odd or Even,
Stop bit : 1 or 2 • For MODBUS 1 bit

Maximum connection : 16 units

Specifications

Communication Extension module (Z-COM)

Communications

- Communication method :** RS-485/RS-422A
Communication speed : 4800, 9600, 19200, 38400 BPS
Protocol :
 a) ANSI X3.28(1976) 2.5 B1 (RKC standard)
 b) MODBUS- RTU
 c) PLC special protocol (Mapman)
 Correspond to PLC
 MITSUBISHI MELSEC series
 AnA/AnU common command (QR/QW)
 (AnA, QnA series, Q series)
 OMRON SYSMAC series
 C mode command (WD/RD/WE/RE)
- Bit format :**
 Start bit : 1, Data bit : 7 or 8 • For MODBUS 8 bit only
 Parity bit : Without, Odd or Even,
 Stop bit : 1 or 2 • For MODBUS 1 bit
- Communication allocation**
 Communication 1 (COM PORT 1 to 2)
 RKC standard or MODBUS protocol
 Communication 2 (COM PORT 3 to 4)
 RKC standard, MODBUS protocol or PLC special protocol (Mapman)
- Maximum connection**
 RKC standard/MODBUS protocol : 16 units
 PLC special protocol : 4 units
- Maximum connection function module**
 Same function module : 16 modules/unit
 Total function module : 31 modules/unit

Z-TIO/Z-DIO/Z-CT/Z-COM Common specifications

General Specifications

- Supply Voltage**
 21.6 to 26.4V DC (Ripple rate 10% p-p or less) [Rating:24VDC]
- Power Consumption**
 a) Z-TIO : Less than 140mA, Surge current : Less than 10A
 b) Z-DIO : Less than 70mA, Surge current : Less than 10A
 c) Z-CT : Less than 70mA, Surge current : Less than 10A
 d) Z-COM : Less than 30mA, Surge current : Less than 10A
- Power Failure Effect**
 A power failure of 4m sec or less will not affect the control action.
 • If power failure of more than 20m sec occurs, controller will restart with the state of HOT or COLD start (Only Z-TIO)
- Memory Backup :** Backed up by non-volatile memory (FRAM)
 • Data retaining period : Approx. 10 years
 • Number of writing : Approx. 1,000,000,000,000,000 times.
 (Depending on storage and operating conditions.)
- Operating Environments :** -10 to 50°C [14 to 122°F]
 5 to 95% RH.
 Absolute humidity : MAX. W.C 29.3g/m³ dry air at 101.3kPa.
- Net Weight**
 Z-TIO Terminal type : Approx 130g (2ch type), Approx 160g (4ch type)
 Z-TIO Connector type : Approx 120g (2ch type), Approx 140g (4ch type)
 Z-DIO Terminal type : Approx 150g (DI/DO 8ch type),
 Approx 120g (DI 8ch type),
 Approx 140g (DO 8ch type)
 Z-DIO Connector type : Approx 130g (DI/DO 8ch type),
 Approx 100g (DI 8ch type),
 Approx 120g (DO 8ch type)
 Z-CT Terminal type : Approx 160g
 Z-CT Connector type : Approx 140g
 Z-COM : Approx 110g
- External Dimensions**
 See external dimensions

Model and Suffix Code

Temperature Control Nodule (Z-TIO) Quick Start Code 2

- Quick start code 2 tells the factory to ship with each parameter preset to the values detailed as specified by the customer. Quick start code is not necessarily specified when ordering, unless the preset is requested. These parameters are software selectable items and can be re-programmed in the field via the manual.

Specifications	Quick Start Code 2					
	①	②	③	④	⑤	⑥

● Accessories

Current transformer for heater break alarm (HBA)

Model : CTL-6-P-N (0 to 30A)

Model : CTL-12-S56-10L-N (0 to 100A)

Model : CTL-6-P-Z (0 to 10A)
[Available for Z-CT module only]

1 (U.R.D.Co.,LTD product)

Plug-in connector

(For connector type module)

Model : SRZP-02
(2 piece)
(Side screw type)
Equivalent part :
MSTB 2.5/5-STF-5,08
PHOENIX CONTACT

Model : SRZP-01
(2 piece)
(Front screw type)
Equivalent part :
FRONT-MSTB 2.5/5-STF-5,08
PHENIX CONTACT

End plates

Model : DEP-01
(2 piece)

To firmly fix the modules,
use end plates on both
sides of the mounted modules
on the DIN rail.

Front terminal cover

Model :
KSRZ-510A

Termination resistor connector

Model : W-BW-01
(For RS-485)
Model : W-BW-02
(For RS-422A)

Standard accessory

Power supply
terminal cover
Model : KSRZ-518A

Connector cover
Model : KSRZ-517A

Communication cables

① Model :
W-BF-01-3000 (3m)
6 pins
Spade lug terminal *

* Other types of cables such as
cable with 9-pin D-SUB connector
are also available.
Please contact RKC.

② Model :
W-BF-02-500 (0.5m)
W-BF-02-1000 (1m)
W-BF-02-3000 (3m)
6 pins
Spade lug terminal

③ Model :
W-BW-03-1000 (1m)
W-BW-03-2000 (2m)
W-BW-03-3000 (3m)
4 pins
Spade lug terminal

④ Model : V6-MLT (3m)
8 pins
Spade lug terminal

Connector for DeviveNet	Open connector (Unshielded type)	N
	Micro connector (Shield type)	1
Available controller	SRZ	02

● PROFIBUS communication converter (COM-JG)

Specifications	Model Code	
	COM - J	G * 02
Type	DeviceNet communication converter	G
Available controller	SRZ	02

● Ethernet (Modbus/TCP) communication converter (COM-JL)

Specifications	Model Code	
	COM - J	L - □ * 02
Type	Ethernet communication converter	L
Communication type	Modbus/TCP	N
Available controller	SRZ	02

● CC-Link communication converter (COM-JC)

Specifications	Model Code	
	COM - J	C * 02 - □
Type	CC-Link communication converter	C
Available controller	SRZ	02
RUN/STOP logic selection	0 : RUN, 1 : STOP	1
	0 : STOP, 1 : RUN	2

● Ethernet (Ethernet/IP) communication converter (COM-ML)

Specifications	Model Code		
	COM - M	L - 2 □ * 02	
Type	Ethernet communication converter	L	
Ethernet communication type	Ethernet/IP	2	
Host communication type	RS-422A		4
	RS-485		5
Available controller	SRZ		02

● MECHATROLINK communication converter (COM-MY)

Specifications	Model Code		
	COM - M	Y - □ * 02	
Type	MECHATROLINK communication converter	Y	
Host communication type	RS-422A		4
	RS-485		5
Available controller	SRZ		02
