Thank you for purchasing this RKC product. In order to achieve maximum performance and ensure proper operation of your new instrument, carefully read all the instructions in this manual. Please place the manual in a convenient location for easy reference.

**CAUTION**

- This is a Class A instrument. In a domestic environment, this instrument may cause radio interference, in which case the user may be required to take additional measures.
- All precautions described in this manual should be taken to avoid damage to the instrument or equipment.

**NOTICE**

- This manual assumes that the reader has a fundamental knowledge of the principles of electricity, process control, computer technology and communications.
- The figures, diagrams and numeric values used in this manual are only for explanation purpose.
- RKC is not responsible for any damage or injury that is caused as a result of using this instrument, instrument failure or indirect damage.
- RKC is not responsible for any damage or injury resulting from the use of instruments made by imitating this instrument.
- Periodic maintenance is required for safe and proper operation of this instrument. Some components have a limited service life, or characteristics that change over time.
- Every effort has been made to ensure accuracy of all information contained herein. RKC makes no warranty expressed or implied, with respect to the accuracy of the information. The information in this manual is subject to change without prior notice.
- No portion of this document may be reprinted, modified, copied, transmitted, digitized, stored, processed or retrieved through any mechanical, electronic, optical or other means without prior written approval from RKC.

1. **PRODUCT CHECK**

Before using this product, check each of the following:
- Model code
- Check that all of the accessories delivered are complete.
- Check that there are no scratch or breakage in external appearance (case, terminal, etc).

**COM–K2–**

- Loader communication cable (Optional)
  - N: None
  - 1: W-BV-01 cable (1.5 m) for loader communication
    - [For square shaped loader port]
  - 3: W-BV-03 cable (1.5 m) for loader communication
    - [For round shaped loader port]

**Accessories**

- USB cable (1 m) ................................................................. 1
- Instruction Manual (IMR01Z02-E1) ........................................ 1

The USB device driver can be downloaded from the official RKC website: http://www.rkcinst.com/english/soft/index.asp

If any of the products are missing, damaged, or if your manual is incomplete, please contact RKC sales office or the agent.

2. **PARTS DESCRIPTION**

- Display lamp
- USB connector
- RS-485/RS-422A communication connector
- Loader communication connector

3. **MOUNTING**

**Mounting Cautions**

1. Use this instrument within the following ambient temperature and ambient humidity.
   - Allowable ambient temperature: -10 to +50 °C
   - Allowable ambient humidity: 5 to 95 %RH
   - (Absolute humidity: MAX. W. C 29.3 g/m² dry air at 101.3 kPa)

2. Avoid the following when selecting the mounting location:
   - Rapid changes in ambient temperature, which may cause condensation.
   - Corrosive or inflammable gases.
   - Direct vibration or shock to the mainframe.
   - Water, oil, chemicals, vapor or steam splashes.
   - Excessive induction noise, static electricity, magnetic fields or noise.
   - Direct air flow from an air conditioner.
   - Exposure to direct sunlight.
   - Excessive heat accumulation.

3. **Mounting consideration**

   - Install the module 200 mm away from the main power line.
   - Ensure at least 50 mm space on top and bottom of the control unit for maintenance and operating environment.

**Dimensions**

(Unit: mm)

- DIN rail Mounting
  1. Pull down the mounting bracket at the bottom of the module (A).
     Attach the hooks on the top of the module to the DIN rail and push the lower section into place on the DIN rail (B).
  2. Slide the mounting bracket up to secure the module to the DIN rail.

**Panel Mounting**

Mount COM-K directly on the panel with screws which are inserted in the mounting holes of the top and bottom mounting brackets.

Recommended tightening torque: 0.3 N·m (3 kgf·cm)

The customer needs to provide the M3 size screws. Select the screw length that matches the mounting panel.
4. Wiring

**WARNING**
To prevent electric shock or instrument failure, turn off the power before connecting or disconnecting the instrument and peripheral equipment.

### Wiring Cautions
- To avoid noise induction, keep communication signal wire away from instrument power line, load lines and power lines of other electric equipment.
- If the personal computer is easily affected by noise, use the ferrite core in the USB cable. For an installation position of a ferrite core, please refer to the following figure.
- Do not connect wires to 4 and 5 pins. Malfunction may result.

#### Method to connect

1. **For loader communication**
   - USB cable
   - Connected to USB port of a personal computer
   - Connected to USB connector

2. **For RS-485/RS-422A communication**
   - The shielded twisted pair wire must be provided by the customer.

#### Connector pin configuration

<table>

      - — 5
    - **RS-485/RS-422A communication connector**
      - Shielded twisted pair wire
      - Communication terminals (Communication 1 side)

- **RS-422A**
  - **Connector pin configuration**
  - **Communication terminals**
    - **COM-K2**
      - SG 1
      - T (A) 2
      - T (B) 3
      - — 4
      - — 5
    - **RS-485/RS-422A communication connector**
      - Shielded twisted pair wire
      - Communication terminals (Communication 1 side)

#### Installation of USB device driver

For installing the USB driver, refer to the following instruction manuals. The manuals can be downloaded from the official RKC website.

- **USB Communication Converter COM-K2 USB Driver Installation Manual**
  - Interface: Based on USB Ver. 2.0
  - Communication speed: Full speed (12 Mbps)
  - Connection: Connected by universal USB cable (Mini-B connector)
  - Power source method: Bus power (The power is supplied from the USB port on the personal computer side)

#### Communication function

- **Interface**: Based on RS-485, EIA standard
- **Connection method**: 2-wire system, half-duplex multi-drop connection (RS-485)
- **Synchronous method**: Half-duplex start-stop synchronous type
- **Communication speed**: 2400 bps, 4800 bps, 9600 bps, 19200 bps, 38400 bps
- **Data bit configuration**: Start bit: 1
- **Parity bit**: None
- **Stop bit**: 1 or 2
- **Protocol**: Depends on application of the personal computer side

#### General specifications

- **Power supply voltage**: 5 V DC ±5 % (Supplied by USB bus cable)
- **Current consumption**: 150 mA max. (Loader communication)
- **Max. mA max. (RS-485/RS-422A communication)**
- **Allowable ambient temperature range**: From -10°C to +50°C
- **Allowable ambient humidity range**: 5 to 95 %RH (Non-condensing)
- **Absolute humidity**: MAX.W.C 29.3 g/m² dry air at 101.3 kPa
- **Weight**: Approx. 40 g (Instrument only)
